

Num	Questions	Chooses
1.	All these structures pass superficial to the flexor retinaculum except :	a- Palmaris longus b- Palmar branch of ulnar nerve c- Palmar branch of median nerve d-superficial branch of radial nerve e- Ulnar nerve answer is "d"
2.	Which medical term is incorrect?	a.Deep means away from a surface. b.Distal means nearer to the point of origin. c.Epigastric means above the stomach. ... d.Itis means inflammation. e.Transverse: upper and lower sections. The answer is (b).
3.	Any of the following sentences wrong:	a-elbow joint ----> superior radioulnar joint b-wrist drop -----> radial nerve injury c- ulnar bursa is related to flexor pollicis longus answer is : C
4.	All the following statement correct about (Rotator cuff muscles) except :	A.Includes Subscapularis , Supraspinatus , Infraspinatus , teres minor . B.Attached to the greater tubercle and lesser tubercle of humerus . c. all muscles are innervated from the posterior cord answer is : C
5.	all of the following are contents of cubital fossa EXCEPT:	a- radial nerve b- median nerve c-brachial artery d-biceps tendon e-median cubital vein answer : e
6.	all the statements are true about palmar aponeurosis except:	a- protect the superficial branch of arteries and nerves b- superficial palmar arch is deep to it c-.it's slips are continued to fibrous flexor sheets d-superficial palmar arch is deep to flexor digitorum superficialis tendons answer is : D
7.	the hormone that triggers ovulation is :	A . FSH B. LH C. a + b Answer : B

8.	One of the following statement is WRONG about the effects of the upper lesion of the brachial plexus, except :	a) Arm is medially rotated b) Elbow is extended ... c) loss of sensation along the lateral side of the arm d) Arm is Supinated 6ab3an el jawab is D :)))
9.	when the early implantation happens :	6 days , 16 days, 4 days, 5 days the answer is 6 days
10.	what is wrong about ""Chorion cavity ((exocoelomic colem.)):-	a-Appears in the evolution of primitive yolk sac b- appear in the day between 10-12 c- surround by amnion ... d- communicate with yolk sac answer ??!
11.	Which of the following is the committed cells in the spermatogenesis ??	A)type a of spermatogonia B)type b of spermatogonia C)spermitted cells D) sperms ... E) 1ry spermatocyte Answer is b
12.	All of the following is considered as ectopic pregnancy if the implantation happened in except??	A) ovary B)mr.doglus (pouch doglus) C)cervical canal D)upper part of the uterus body ... E)uterine tube Answer is d
13.	All the following is right about breast except ??	A)the axillary tail pierces the deep fascia to the axilla B)مش عارف بزبط شو بس Posterior to it is pectoralis major and serratus anterior C) ... D)it is base extend from 2nd to the 6th rib E)the lateral sides is drained into Lateral lymph nodes of the axilla Answer is E
14.	سؤال تبع الي مش قادر يمسك سيجارة بايده .. شو العصب المضروب ؟	Ulnar
15.	سؤال الي مش قادر يعمل Abduction الي لما حدا يساعده بالبداية .. العصب المضروب ؟	Suprascapular

16.	mark the wrong statement about spinal cord :	<p>a- it is originated from the base of the neck b- the spinal nerve is motor nerve c- it has two enlargements for plexuses ... d- it has 31 segments e- the answer is "b"</p>
17.	Supination and pronation, ALL the following statements are true except:	<p>a- Done by inferior and superior radioulnar joints b- One of pronator muscles is closely related to Median Nerve ... c- One of supinator muscles is closely related to Musclocutaneous Nerve d- Pronation is lost when Median Nerve is cut proximal to flexor retinaculum</p> <p>The answer is "d"</p>
18.	the main event in mieosis that form new gametes with unique genetic codes is :	cross over between nonsister cromateds
19.	One of the following is wrong about follicular phase	<p>a-happens before ovulation b- something about (eshe basalis) c-something about glands d-something about blood vessels e- the thickness of the endometium is 2-3cm Answer: e</p>
20.	one of the following is wrong about superficial palmar arch :	<p>1- it is proximal to the deep palmar arch 2- it is deep to the flexor digitorum superficialis</p> <p>the answer is one of theses , and maybe it's 2 !</p>
21.	During ulnar nerve injury all is possible except:	<p>a- first 2 lumbar are not included. B- clawing of all fingers is possible C- ulnar deviation of hand is not weakened.</p> <p>Cant remember the rest bs the answer is C :)</p>
22.	which one of these is not related to the bicipital groove (inter-tubercle groove)? " i guess "	<p>a. long head of the biceps b. latissimes dorsi c. pectorals major d. Teres major ... e. supscapularis</p> <p>i think its E</p>
23.	Which of these statements is wrong concerning the shapes of joints:	<p>1. the shape of the shoulder joint is (ball and socket) 2.the shape of the elbow joint is (hinge) 3. the shape of the carpometacarpal joint is (condyloid) 4. ... il jawab 3</p>

24.	one of these is wrong about fertilization:	a-resumes the meiosis division b-the cleavage starts after 24 hours c-provide a haploid nucleus d-Restores of the diploid number of chromosomes e-determines the sex of the embryo i think the answer is c
25.	which of these dosen't happen at the level of insertion of coracobrachialis muscle :	1- radial nerve pierces the lateral intermuscular septum 2- ulnar nerve pierces the medial intermuscular septum 3- the median nerve crosses from lateral to medial 4- I don'r remember :P answer : a
26.	which one of these structures dosen't pierce clavipectoral fascia :	1- lateral thoracic artery 2-thoracoacromial artery 3-lymph vessels 4- lateral pectoral nerve Answer : ??? maybe 1 or 3
27.	which of the following don't insert on extensor expansion :	a) lumbrical muscle b) palmar interossie c) dorsal interossie d) extensor pollicis brevis I think the answer is - d -
28.	what is wrong about shoulder joint ?	a- it is a synovial joint. b- it is commonly dislocated inferiorly. c- infraspinatous and teres minor are located posteriorly to it. d- the acromiohumeral joint ligament is a powerful supporter superiorly ... e- answr is d
