

Correction
Dr samar

Sheet 1

page 1

- * family health survey : very important reference that reflects the most important indicators that show the level of health status in any community
- * every 5 years and needs 2 years to become ready .
- So every 7 years there is anew family health survey .
- * in Jordan the first one was at 1997
- * the last published one in 2007 (our reference)
- * 2012's survey is not ready yet

page 2

- * one of the primary health care services is screening specially if there is a risk factor or family history for a disease (diabetes)
- * we are in 2013 , however the aim of PHC is not completely achieved , But PHC cover most of the word , not all ...

page 3

- * can not afford for this highly sophisticated management
- “ remember “ .. that's needed for complication

page 6

- * health is the absence of physical , social and psychological problem or physical well being
- ** the absence of disease not treating it
- line 6 , the 1st line of PHC
- line 9 , all these points are of the health sector , which is an important part of PHC , but not the only one .
- PHC >>> intersectoral “ check page 3/ hand out “ .
- Line 12 , specially >>> child , pregnant women and elderly .
- iron >>> given for free for all pregnant ladies because of the risk of anemia

The box

- * 60% not 80%
- * why they are under physiological stress ?
- child >> growing
- Mothers >> pregnant
- Normally : the weight of pregnant increase from 10-12 kg , over that >> problem

Sheet 2

Page 1

line 23

* And ends with elderly .

* we can summarize the main points that effect health

- employment - work conditions - culture

- social support - geography - education - physical factors

Page 2

Line 3 , chronic disease not growing

Line 7 , concerned as degenerative disease

Line 11 , it's adolescence not adenosis !!

Line 27 , Gp >> general practitioner

Page 4

Line 19 , sector not sickter . intersectoral not interckter

Line 21 , these are the features or the main principles of PHC not the elements , essential elements are in “ page 12/ hand out “

Page 5

line 9 , prevent and control infections

Line 21 , asymptomatic not tomatic

Sheet 3

Page 1

Line 10 , about PHC not medical services

>>> check sheet #2 for more explanation

Page 4

Line 24

* in Islamic world , the birth control – plan the timing of pregnancies accepted

* sterility and ligation are not accepted

Sheet 8

page 5

* the percentage of the causes of death in low income countries , are correct , don't know what they meant in the ” total correction “

Page 7

line 5 , 17/1000 not 17%

19/1000 not 19%

Sheet 9

Page 1

Line 25 , this point >> تابع لـ نقطة واحد
Line 28-30 , the point affected fecundity
Line 31 , infecund >> infertile

page 2

Line 6 , in 1990 was 7.2 , 3.6 in 2007 , 3.5 in 2012

ADD >>>

*child bearer : producing children

*child rearer : bringing up children “ more important “

Line 25 , the age of first marriage 25 not 28 “ ask dr samar “

Line 26 , productive age 15-49 = “ child bearing age “

Sheet 10

Page 2

Line 32 , at 2029

Page 3

Line 30 , at birth 106 male : 100 female

Sheet 11

Page 1

Line 10 , replacement <2

Line 17 , high

Page 6

table m row #5 * 2029

بالتوفيق ^_^
