GI Lab

LAB GI:
-histo:

1- pointed (portal triad)-all of the following related except:

a-portal v
b-hepatic A

c-pile duct
d-reticular fibers

e-bid sinusoid ***

2-identify----pancreas

3-identify----colon

4-identify----esophageal proper glands

identify----chief cell

Anatomy:

1-tongue---hypoglossal N

2-tongue[ant.2 third was pointed]...wrong statement----develops from the 2nd pharyngeal

arch

3-mandible[coronoid process pointed]was on the post. aspect[---buccal N

4-skull----foramen ovale[what is the preganglionic part, sympathetic]----lesser petrosal N

5-liver---[fong statement]---was the gastric impression[the wrong position]

Micro

1-eggs----ascaris

2-what is the intermediate host of the hepatic---copepode

3-petry dish[identify]---shigela

Patho

1-pic of hemosiderin----iron

2-colon cancer (ulcer)---in male

3-pic of histological appearance of reflux esophygitis. [what it will cause?] ---barret disease

4-picture for cirrhosis " which one of these diseases doesn't lead to it

c-Rey's ***

b - alcoholism

a - hepatitis

d - biliary disease

physio

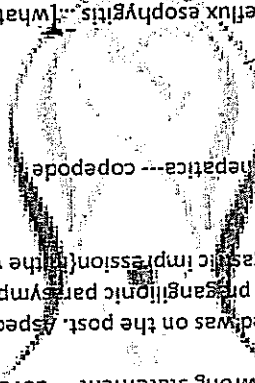

✓haunting >>> alternative.constriction and relaxation
✓peristalsis >>> propulsive movement of small intestines
