

## Immunology Sheets Correction

8th July 2014

### Sheet 7

#### Page 6

- C1s is a Serine protease which cleaves C4 and C2 when they bind to the complex.
- C2a cleaves C3 and C5.

#### Page 8

- Factor D can cleave factor B only when factor B binds to C3b.
- Properdin increases the half life of the convertases by 8 times not 20 times.

### Sheet 8

#### Page 2

- "This complex C5b6789 is known as Mac"
