

Immunology Sheets Correction

18th July 2014

Sheet 12

Page 1

- "... and these are equivalent to CD5+ or B1 B-lymphocyte" not "CDRB16"

Page 3

- If T cell isn't stimulated by secondary stimulation, it will become anergic - **not allergic** - or undergo deletion by apoptosis.

Sheet 14

- TNF contributes to acute phase response by working on hepatocytes and increasing their synthesis of certain proteins.
