

- Slide #2 after diminished RBC production:
Iron def. anemia, aplastic anemia, pure red cell aplasia, megaloblastic anemia, myelophthitic anemia, myelodysplastic syndrome.
- Slide #3 after according to morphology: Blood film.
- Slide#4: it contains 3 statements:
 1. Slight variation is present between labs/geographic areas
 2. Sex, age, race and mobility status have effects
 3. Red cell distribution width...etc.
- Then there was a slide from JUH for lab tests I guess, and it was filled with numbers and he said that we have to memorize them and I guess they are the same in slide #4
- Slide #8: after point #3: erythropoietin, LDH, retic count??
